

CREST TOKEN

....A Community-Centric Token that pays Daily Passive Income....

Millions pursue the dream of earning substantial income from online marketing; few make that dream a reality. The Crest DigiAd Platform serves both seasoned advertisers/marketers and users with zero marketing experience while being profitable for all.

THE CREST DIGIAD PLATFORM

The Crest DigiAd Platform is a unique blockchain-based advertising application. By combining smart contract technology and AI, its proprietary software/hardware runs, manages and tracks campaign results and earnings.

The platform is divided into three sections:

- The DigiAd Platform for Advertisers- enables advertisers to set up and run both non-crypto related campaign verticals and crypto-to-crypto ads within the blockchain.
- The DigiAd Platform for Publishers/Affiliates-enables both crypto and non-crypto publishers/affiliates to earn from ads displayed on their websites or traffic sources.
- The DigiAd Platform for Community Members - enables all users, although they may not be marketing specialists, to earn passive income by funding the most profitable campaigns running on the platform with a return of 1.15% to 2.25% paid daily. Additional passive revenue streams are offered through generous staking and referral programs.

THE CREST ECOSYSTEM

Crest is the community-centric, business ecosystem built around the Crest DigiAd Platform. It includes the following four components that add functionality and scalability: Crest's Internal Exchange, which facilitates transactions; Crest's Crypto Trading Platform, which provides opportunities for profit; the Crest Affiliate Marketing Education System, which trains aspiring and experienced marketers, thereby constantly expanding the platform's market-share; the Community Forum, where members can interact and have a say in the growth of the ecosystem.

The only payment unit accepted in the ecosystem is the ERC-20 Crest Utility Token (CSTT). Because it is tied to the USD330b online marketing industry through an actual business application, the token is arguably less prone to market volatility.

Crest's business model gives stability and longevity to the ecosystem and token through multiple income streams and a global community whose pooled resources position this unique platform to become a true influencer in the online marketing industry, taking it into the future.

MISSION STATEMENT

To create a community-centric platform, which enables its members to become experts in the online marketing and digital advertising industry while generating income through the power of blockchain technology.

Token Sale Information

51.20%
Main ICO (6,400,000)

36.80%
Staking Reserve
(4,600,000)

8%
Pre Sale ICO
(1,000,000)

4%
Bounty Reserve
(500,000)

Total Supply
12,500,000

TOKEN SALE

Payment Method Accepted: BTC ETH XMR

Softcap: \$2M USD

Hardcap: \$6.65M USD

Token Price: \$0.30 - \$1.70 / CSTT

Token distribution: Instant

Pre-ICO: \$250k (\$0.25/CSTT)
